**Job Title:** Summer Students/Internships – Kitimat, BC

**There's never been a better time to be working with LNG Canada.**

Why? Because we're building the largest private infrastructure project in Canada. Our industry-leading liquefied natural gas (LNG) export facility will provide the world's cleanest LNG, with the lowest carbon intensity.

This is your opportunity to be part of history, in an environment that will challenge you to apply all of your skills, and where you can learn with a diverse team of highly experienced industry professionals and mentors.

LNG Canada maintains a healthy, respectful and safe environment for all of our employees, contractors, partners and communities. Protecting our people, community and our operations is our top priority; our project has committed to meeting some of the strictest regulatory standards in the world.

**Our Vision:** To be the leading LNG export company in British Columbia and the world.

**Our Mission:** To be seen by our stakeholders as the Company of Choice.

**Our Values:** Respect, collaboration, integrity and safety.

Come join the team making Canadian history!

## About the Role

LNG Canada is currently looking for post-secondary summer students to join our exciting project in Kitimat, BC. We have opportunities within our HSSE (Health, Safety, Security & Environment), Construction and External Relations (Communications & Indigenous Relations) teams.

As a Summer Student you will have a once in a lifetime opportunity to gain hands on experience in the construction of an LNG mega project. You will be able to take the skills you are currently learning in school, put them into practice and develop yourself to support professional growth.

**To succeed with us, we need your enthusiasm and expertise to:**

- Contribute to the Safest Project on Earth by adhering to our HSE ways of working and participating in our LNG Canada culture
- Work well with field-based construction teams in a team environment.
- Conduct field-based inspections and audits.
- Develop presentation material to accurately reflect information, findings and data for various stakeholders.
- Depending on the specific role, you could have the opportunity to:
  - Interface with the Corporate IT and HSSE Systems groups.
  - Conduct field inspections with team members and translate actual drone surveillance with real time data.
  - Assist in water and soil sampling, including calibration and use of environmental monitoring equipment
  - Coordinate the environment and compliance team quarterly risk register and work plan reviews
  - Work with Environmental Advisors to assist in site inspections, scope coordination and various initiatives
  - Support the Construction Engineering team with various projects supporting safe and successful construction activities.
  - Support the External Relations team with both internal and external communications and stakeholder engagement.

**To be successful, you will have:**

- An ability to work in Kitimat, BC.
- High skill level in working with computers and proven experience in developing automated tools.
- Excellent working knowledge in Microsoft Office programs.
- Skilled ability to work in excel spreadsheets with large amount of data and attention to detail
- An easy, open and inquisitive attitude with an ability to shift priorities, work under pressure and manage multiple projects
- Excellent written and verbal communication skills with a team player approach and positive attitude.
- A key Interest in advancing best practices and utilizing leading edge technology.
- A curious and flexible mindset, with the ability to adapt quickly to the requirements of the role
- A valid BC Class 5 drivers license is considered an asset

**This role requires that you:**

- Are currently enrolled in a post-secondary education program within one of the following disciplines:

- Engineering, Business, Environmental Sciences, Information Technology/Computer Programming or similar program.
- Are legally entitled to work in Canada (i.e. by way of Canadian citizenship, permanent residency or valid work permit)
- Reside in the Kitimat/Terrace area in British Columbia.
- Depending on the role, have the ability to work outside in all weather conditions, that can include rain, hot weather, cool or dusty days
- Completion of a clear Site Access Alcohol & Drug Test
- Are willing to comply with LNGC's drug-free and harassment-free work environment and comply with all safety policies and procedures.
- Work a 40-hour week- 8 hr./day, depending on the department that you may not necessarily have every Saturday and Sunday off.
- Roles will start approximately May 25, 2021 to August 27, 2021

### **We offer**

- A once in a lifetime opportunity to gain hands on working experience on the largest private infrastructure project in Canada
- A strong learning and development culture to support your personal and professional growth including mentorship with industry professionals
- The opportunity to grow your work experience and build a network with trusted industry professionals.

### **About Us**

LNG Canada is a joint venture comprised of Shell Canada Energy (40%) and affiliates of Petronas (25%) PetroChina (15%), Mitsubishi Corporation (15%) and Korea Gas Corporation (5%). The joint venture is building a liquefied natural gas (LNG) export facility in Kitimat, British Columbia.

LNG Canada sets out to be a project of choice for British Columbia and Canada. Safety, shared economic value, environmental performance and social performance are our highest priorities. We have partnered with governments, local communities and First Nations to maximize shared value.
